# FRONT END WEB DEVELOPER

contactmail@mail.com | 777 777 777 | <https://github.com/placeholder> | Someplace, Country

## PROJECTS

---

### CARBYNE-EXPLORATIONS | <https://carbyne-explorations.netlify.app>

Highly specific, unique, animated UI/UX solution, where hand-coded, background and animated SVG graphics mesh together with modular React components, context, JSX, hooks, state and custom hooks for consistent SVG math, to generate a colorfully immersive, animated, artful look. It's my personal content repository and blog. Ideating, designing, coding everything in the app entirely on my own.

### OXUS FLASHCARDS | <https://oxus.netlify.app/>

Large-scale, real-world web app in React, with NoSQL database, users, authentication, integrated onto coherent UI/UX solution. Works on smallest cellphones/large PC screens. User can view/edit/add text and/or image to a card with question/answer sides; turn card, see answer; shuffle it in a deck to a position based on difficulty or put it to "completed cards" heap; see number of completed cards; can view list of his/her decks; can create/edit/delete a deck of cards. Ease of navigating between displayed list of decks, deck, deck menu, flashcard menu, in intuitive order. Ideating, designing, coding everything in the app entirely on my own.

### MONTH GLANCER | [month-glancer.netlify.app](http://month-glancer.netlify.app)

*This entire app is coded with nothing other than Javascript – not even a single line of HTML or CSS. Javascript training challenge.* All layout, graphics, components, drag & drop functionalities, icons, colored stylistic effects, and everything else is performed with raw Javascript and nothing else.

App is equivalent of having a paper calendar and colored sticky notes except that days also have 24 hour columns, sticky notes can be of set hours size, and they auto-spread on equivalent number of columns in the day. For example, 3 hours takes 3 columns within a day. User can drag-and-drop these onto calendar, which matches real calendar data.

- layout split into two: 1) colored projects, 2) 12 month calendar (carousel)
- 1) top - list of projects, add/edit/delete projects, add/edit/delete re-sizable (1-24) drag-and-droppable "stickies"
- 2) bottom – calendar carousel, auto-generated from Javascript Date() interface, split into styled week rows, day blocks, with draggable 24 hour columns which respond to drag-and-drop of re-sizable color "stickies".

### VIMEO SEARCHER | <https://vimeo-searcher.netlify.app/>

Videos based on search. Uses **external API** and **Local Storage to minimize requests. RWD. Unique UX.**

### TIME CARDS | <https://app.netlify.com/sites/time-cards/overview>,

### GATSBY BLOG | <https://carbyne-explorer.netlify.app>,

### COFFEE WEB PAGE | <https://coffee-tabs.netlify.app/>

## SKILLS

---

A) pragmatic ideating and designing | B) UI/UX | C) easy-to-maintain, practical, modular code architecture

D) React: composing components | JSX | conditional rendering | React context, passing data | hooks, custom hooks | state

E) Database: REST, endpoints | connecting Frontend/UI forms with database | making and using basic NoSQL database (i.e. Google Firebase) | authentication

F) Scalable Vector Graphics (SVG): SVG <path/> | custom SVG's with React and JSX | coding unique, specific SVG's | SVG animations | animated SVG's as user interface elements | managing many intersecting SVG's | modular code with SVG's

G) Javascript: ES6 | prototype chain | arrays | objects | functions, functions as objects | scope, scope contexts | variables

H) Javascript, asynchronous code: promises, callbacks | ES6, async, try, catch, await | using asynchronous code with React state, hooks

I) CSS: Flexbox | absolute/relative positioning | box model | BEM technique | CSS imports | modular CSS, small files | SASS

J) Responsive web design K) Supplementary skills: version control (GIT) | hosting a website

## EXPERIENCE

---

**Fream Sp. z.o.o , Custom Software Development Company in Wroclaw, Poland.**

08.2017 – 06.2019

**Role: Junior Web Developer. Responsibilities:** first months, a project's website, RWD in CSS, HTML, jquery. Next, moved to Polymer 1.9.3 project. Working under my mentor, creating features for 3D editor for a VR project, which included making pages, menu columns, drag & drop solutions, color palettes, REST and code for communicating with backend. After, I coded most of the frontend pages for purchasing subscription models. It involved currency translations, handling multiple ranges of cases and co-operating with teammates responsible for backend portion of these functionalities.

**Dealz Sp. z.o.o., Chain of Discount Retail Stores, Marketplace in Wroclaw, Poland**

08.2020 – 06-2021

**Role:** Warehouse operator/Sales clerk. **Responsibilities:** assisting clients, unpacking and ordering store items, operating pallet truck. This job was a highly social experience, it required constant communication and ability to handle multiple things at once.

**Jaffa Sp. z.o.o., Bricomarché, Chain of Retail Stores offering decorating, DIY, building, gardening products, Marketplace in Wroclaw, Poland**

11.2021- 05.2022

**Role:** Sales specialist. **Responsibilities:** professionally communicating with clients, checking and confirming documents for store deliveries, unpacking and ordering materials, adhering to store's and warehouse's operational procedures.

## EDUCATION

---

**Universities:** Master's degree, International Economic Relations, specialty: International Business, University of Economics in Wroclaw, Poland.

09.2010 –05.2016

**Languages:** Polish – native, English - C2. Fluent, both in spoken and written form.

## INTERESTS

---

Subjects such as systems, processes, geometry, daily routines, habits, purposeful diet, optimizing, improving work input/output ratio, anything practical and useful. Communication skills and social skills. Going out often, living an active life socially. Chess. Sports, fitness, gym, daily exercising. Writing, journaling, poetry. Drawing conceptual ideas. Studying curious and useful books, such as J. Waitzkin The art of learning, B. Oakley Learn like a pro | R. Dalio Principles | J. Willink, L. Babin Extreme ownership, J. Clear Atomic habits. Interviews and podcasts with accomplished people, e.g. T. Ferriss podcast. Stand-up comedy, Bill Hicks, Fluffy. Shows such as D. Letterman, Between Two Ferns with Zach Galifianakis. Movies similar to Kac Vegas. When I'm not working, I like to laugh and spend time with my friends.
