PERSONAL PROFILE

I am a first year student at Wroclaw University of Technology with a passion for programming, especially in python. I am eager to learn and explore new technologies. I am looking for a job to expand my knowledge with practical experience.

COMPLETED PROJECTS

Pond evolution
https://github.com/Suchy702/pond-evolution

A simulation showing and depicting the evolution in a pond of organisms at given initial values, allowing user intervention.
Written in python with type hints, using pygame, tkinter, pandas, numba, among others.
