Possess knowledge and skills in C#, as well as experience working with various technologies such as ASP.NET, WPF, Windows Forms, Entity Framework, and tools for testing .NET applications like xUnit and Moq.

EXPERIENCE

SOFTWARE ENGINEER

Firma A

- Migrating existing monolithic applications originally developed using .NET Framework and AngularJS to .NET Core and React. This migration process involved utilizing programming languages such as C# and TypeScript. The primary objective of the project was to reduce technical debt and transform the monolithic architecture into a microservices one. The goal has been successfully accomplished. The migration applied development best practices such as SOLID principles, as well as design patterns such as the Builder and Facade patterns. Additionally, the project was executed following agile methodologies, ensuring flexibility, adaptability, and iterative development.

February 2022 – Present

JUNIOR .NET DEVELOPER

Firma B

- Developing and maintaining time registration and access control applications based on .NET Framework using C# and Windows Forms and stored procedures,
- Creating a vehicle management application for the company to verify vehicle availability and enable reservations using C# and Entity Framework.
- Designing and creating a new company website using WordPress, JS, and HTML5, resulting in a substantial increase of around 35% in inquiries and notable improvements of around 20% in sales performance.

August 2019 – February 2022
