Experience

PHP/Laravel Developer — COMPANY 2 05-2022 — present

- Led modernization and optimization of application - it consisted of query optimization, redesigning some parts of the database, and restructuring of the project. **It resulted in lowering application load times by approximately 60%.**
- **Implemented automatic tests for the first time and achieved a 40% test coverage.**
- Designed, documented, and created form and table creation system. It accelerated the time to implement new functionalities and unified system design.
- Developed a system for issuing, creating, and managing invoices, seamlessly integrated with external OCR. It resulted in streamlined coordination between various departments and clients.
- Created a tax and payment management system, and integrated it with the invoicing system, simplifying the bookkeeping processes.
- Refactored the legacy role and permission system, leading to a more faithful representation of clients' company structure.
- Managed a team of junior developers and interns, serving as their mentor and team leader.

IT Technician — COMPANY 1 2018 — 2022

- Diagnosed and repaired laptops and computers.
- Managed company backup and development servers.
